Storyboard Preview:

- Root View Controller: Jogr app splash screen with a red running icon and "GET READY TO JOG" text. Buttons for "TIMER" and "ROUTES".
- Run View Controller - Run: A screen showing a timer at "00:00:00.00" and a "Pause" button.
- Map Routes View Controller - MapRoutesViewController: A screen showing an "MKMapView".

Code Editor (RunViewController.m):

```

- (void)didReceiveMemoryWarning
{
    [super didReceiveMemoryWarning];
}

- (void)viewWillAppear:(BOOL)animated
{
    if (!_timer || !_pause) {
        [self pauseOrRun:self];
    }
}

- (NSString *)timeStringForInterval:(NSTimeInterval)interval
{
    long hours = (long)interval / 60l;
    long minutes = ((long)interval / 60l) % 60l;
    long seconds = (long)interval % 60l;
    long hundredths = (long)(interval * 100.0) % 100l;

    return [NSString stringWithFormat:@"%02ld:%02ld:%02ld.%02ld", hours,
        minutes, seconds, hundredths];
}

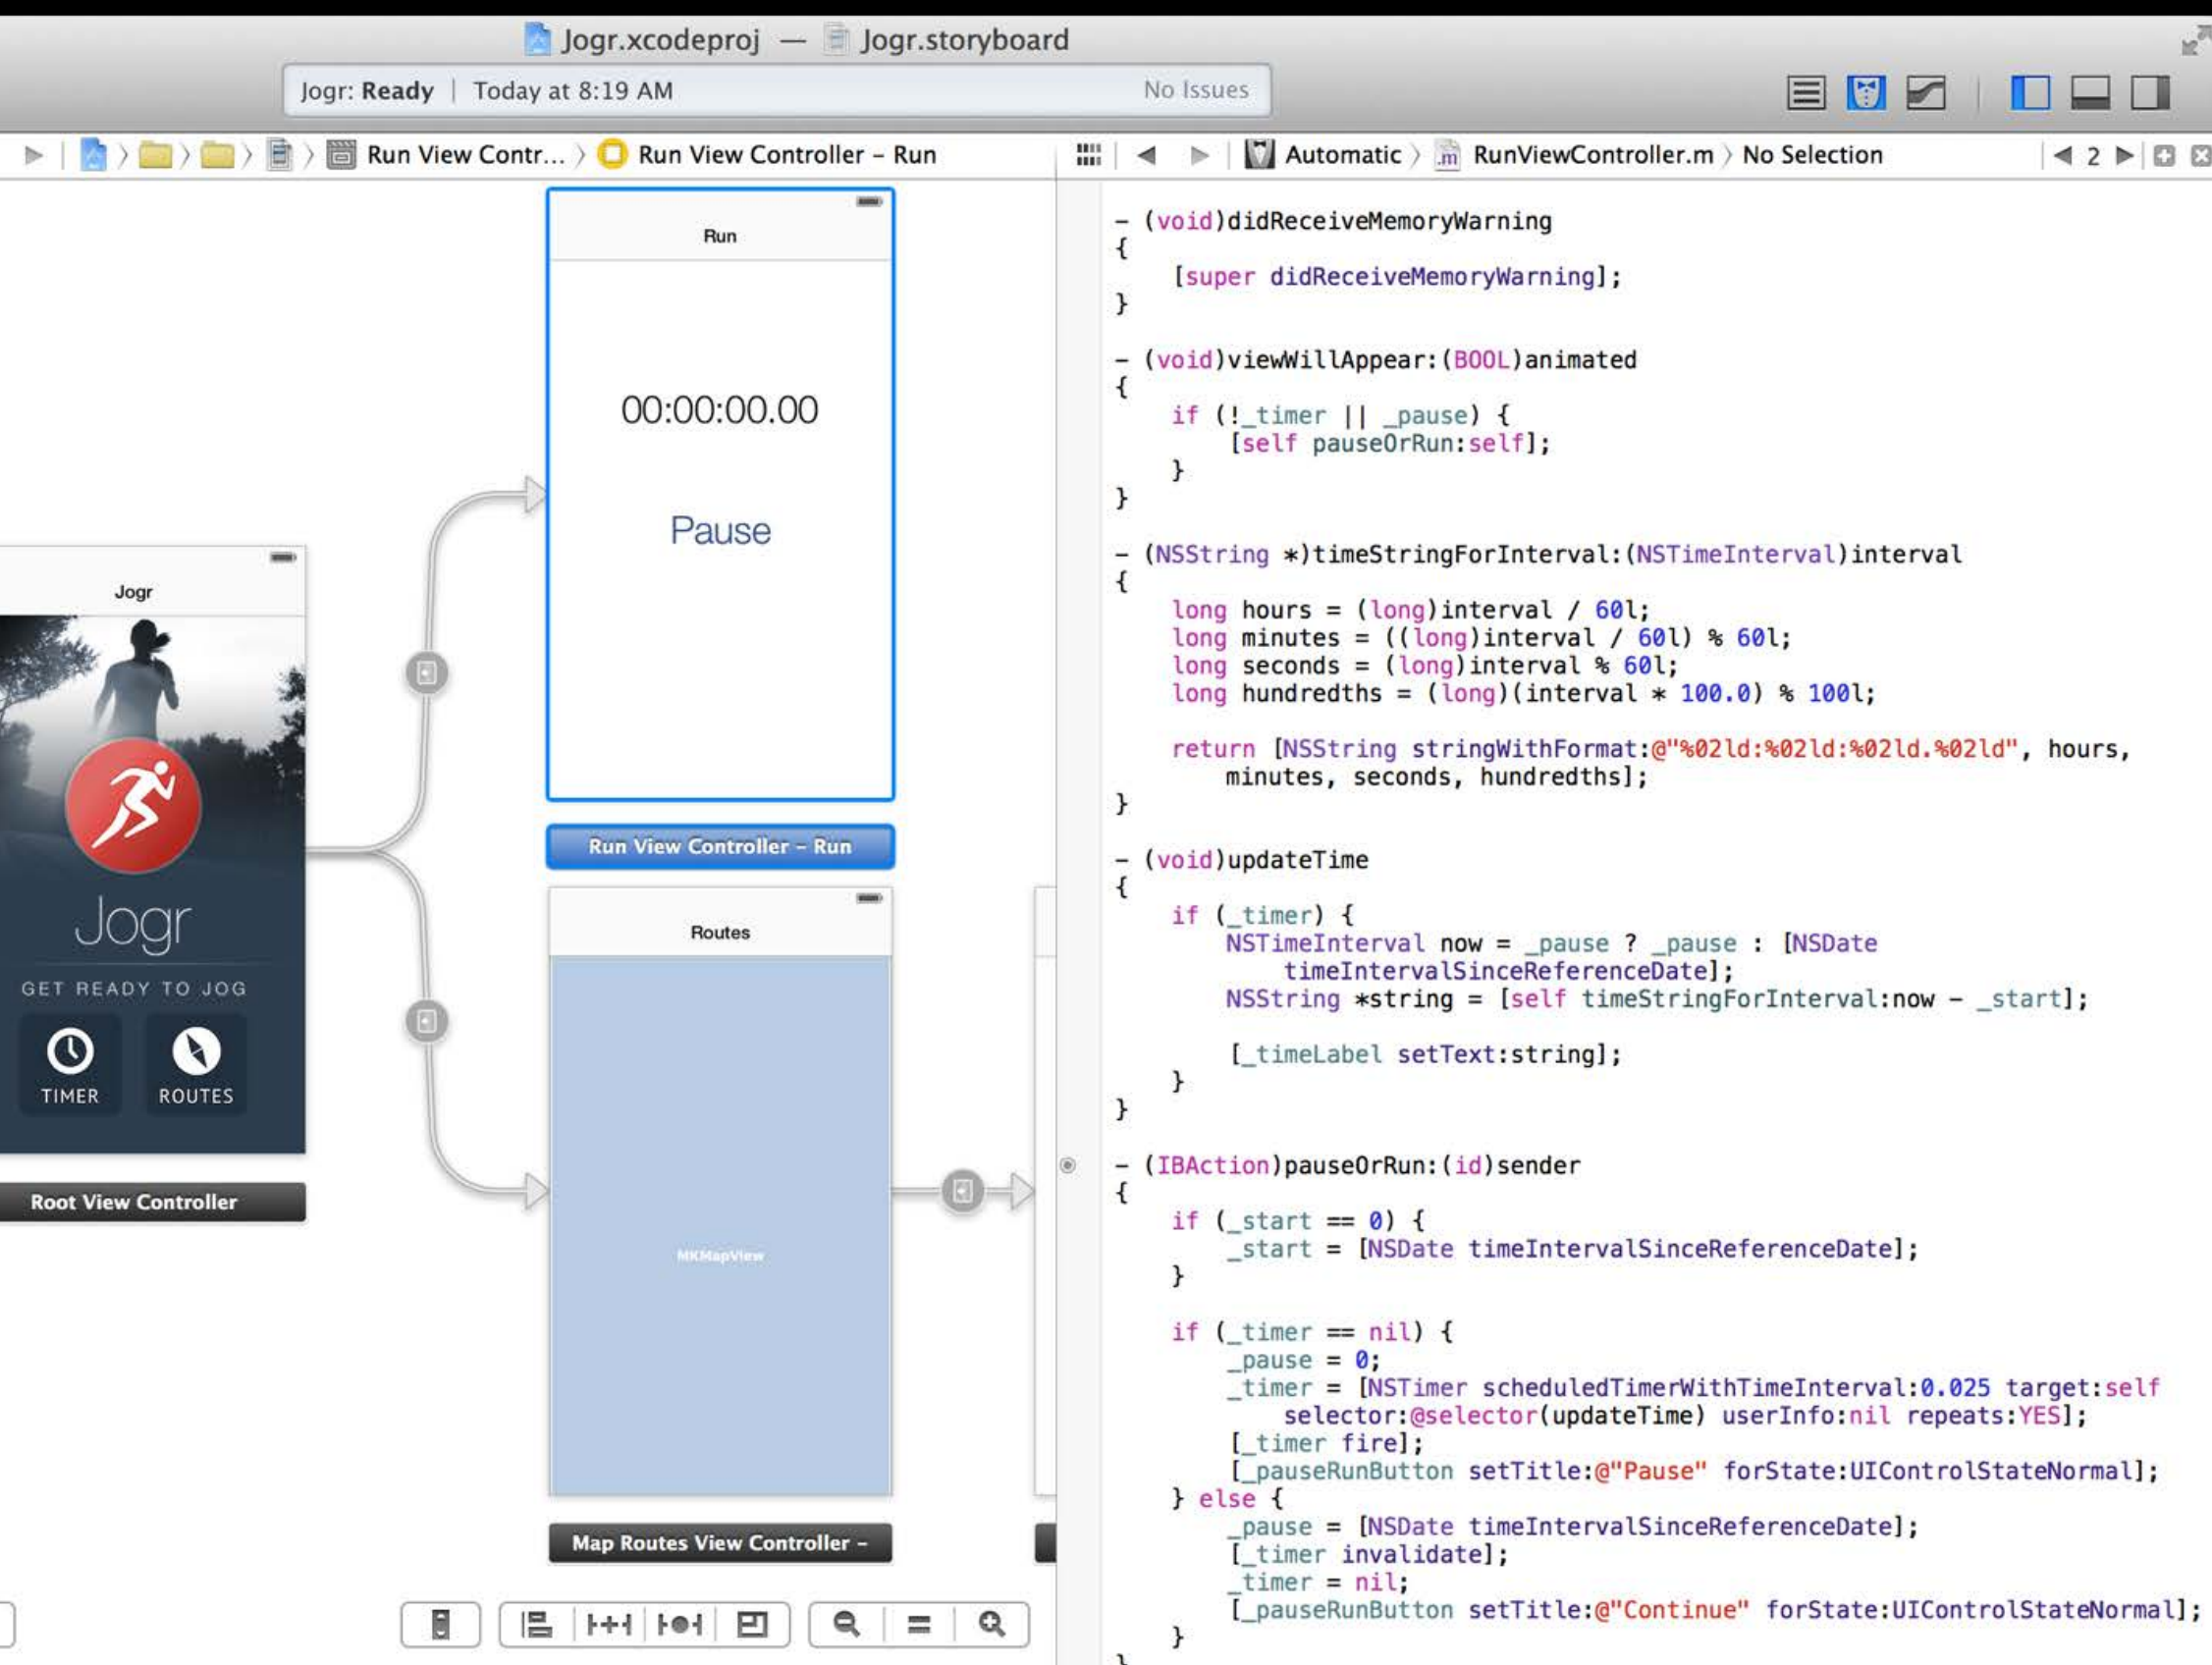

- (void)updateTime
{
    if (_timer) {
        NSTimeInterval now = _pause ? _pause : [NSDate
            timeIntervalSinceReferenceDate];
        NSString *string = [self timeStringForInterval:now - _start];

        [_timeLabel setText:string];
    }
}

Functions and Closures

Use `func` to declare a function. Call a function by following its name with a list of arguments in parentheses. Use `->` to separate the parameter names and types from the function's return type.

```
func greet(name: String, day: String) -> String {  
    return "Hello \(name), today is \(day)."  
}  
greet("Bob", "Tuesday")
```

```
"Hello Bob, today is Tuesday."
```

```
"Hello Bob, today is Tuesday."
```

EXPERIMENT

Remove the `day` parameter. Add a parameter to include today's lunch special in the greeting.

Use a tuple to return multiple values from a function.

```
func getGasPrices() -> (Double, Double, Double) {  
    return (3.59, 3.69, 3.79)  
}  
getGasPrices()
```

```
(.0 3.59, .1 3.69, .2 3.79)
```

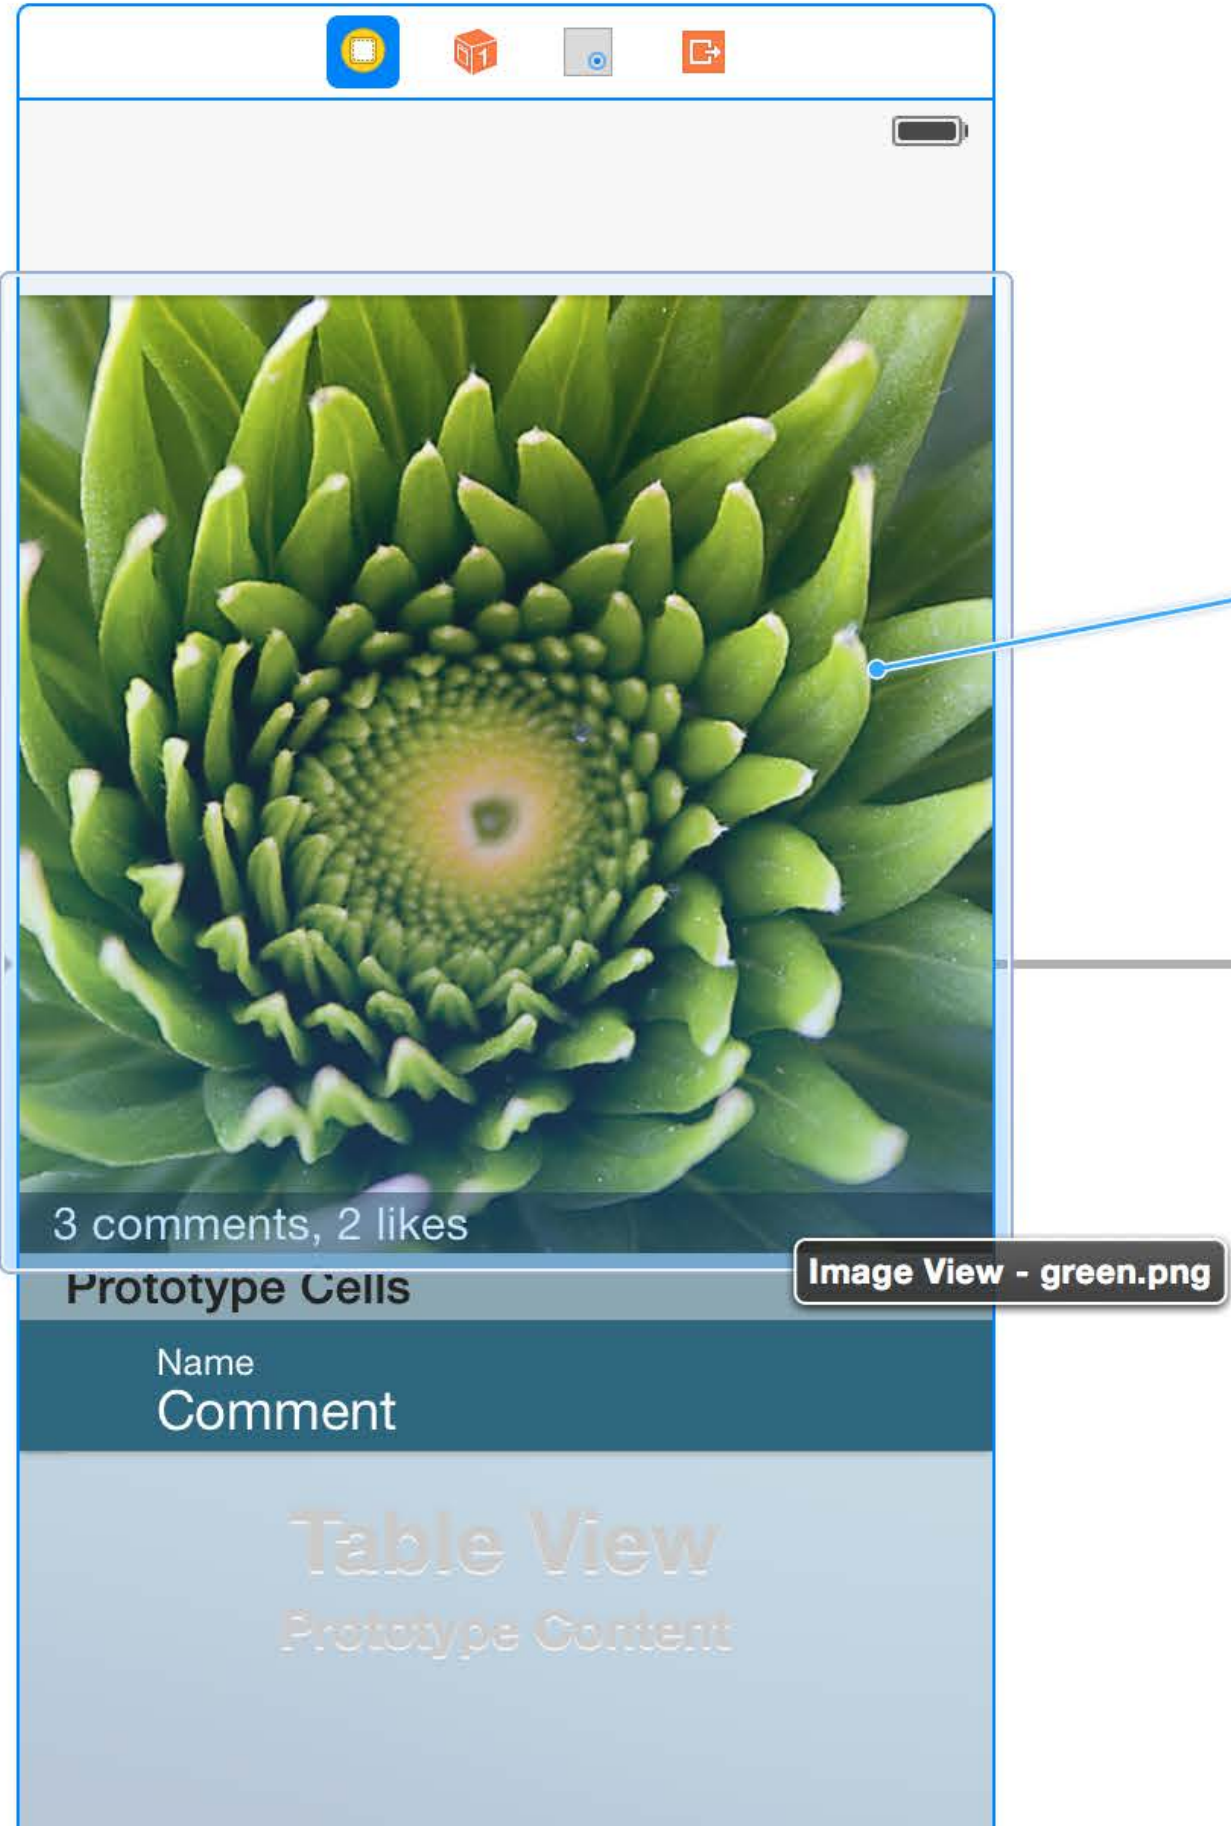

```
(.0 3.59, .1 3.69, .2 3.79)
```

Functions can also take a variable number of arguments, collecting them into an array.

        // [  
        //     IB_PROJECT_SOURCE_DIRECTORIES = "/foo/bar/project 1,  
        //                                     foo/baz/project 2",  
        // ]  
    }  
}
```

The logo consists of a blue arrow pointing to the right, with a white outline. The arrow has a rounded left end and a sharp right end. Inside the arrow, the text "LLDB" is written in a white, bold, sans-serif font.

LLDB

The logo for LLDB (LLVM Debugger) is a blue arrow pointing to the right. The arrow has a white outline and a gradient from light blue on the left to a darker blue on the right. The letters 'LLDB' are written in white, bold, sans-serif font across the center of the arrow.

LLDB
