60 Second Prototyping

Session 818

Guillaume Ardaud, Designer
Let's disrupt the timer app market and make 2017 the year of the timer. Send me some timer app designs! 😊⏰⏰⏰
No time!
This is not a real app.

How can we make this better?
What’s working?
What’s working?
What’s not working?
Do we display time left, or time elapsed?
Do we display time left, or time elapsed?

How do you pause or stop the timer?
Do we display time left, or time elapsed?

How do you pause or stop the timer?

Should we show the time in digital or analog form? Both?
Do we display time left, or time elapsed?

How do you pause or stop the timer?

Should we show the time in digital or analog form? Both?

Are we building a generic timer, or one for a specific purpose?
Do we use buttons to set the time, or let the user drag the clock’s hands?

Can you input 90 minutes instead of 1h30? Does it make a difference?

What sort of alert should the timer play when done?

Can you set a timer for a day? A month? A year? Do mechanical timers dream of electric sheep?

What sort of alert should the timer play when done?

How do you pause or stop the timer?

Can you set a timer for a day? A month? A year? Do mechanical timers dream of electric sheep?

Should we show the time in digital or analog form? Both?

How do you pause or stop the timer?

Should you be able to interact with the timer hands free?

Should you be able to set multiple timers at once? What if the user can’t look at the screen during the activity?

What is the opposite of time?

Are we building a generic timer, or one for a specific purpose?

Can you input 90 minutes instead of 1h30? Does it make a difference? How can we tell it?
